Hi Everett,

Happy Birthday! We think the edits to the CEA are done and it's ready for your review in case you want to take a look. It's a beast of a document – 173 pages—so we flagged some issues for you to hone-in on. Lucita and Valois—please feel free to weigh-in if there are other issues we should flag for Everett. In case it's helpful, I'm also including a chart that describes each section (table 2) and some of the changes we made in the CEA (table 1, based on comments received). If you'd like a general overview of the document also, please let me know and I can schedule some time to chat.

For now, the comments are left in, in case you'd like to see the background of some of the changes. The comments labeled "c1" for example, or those that start with "c" are Powertech's comments. For their more substantive comments beyond grammatical ones, we took these comments and incorporated them into the RTC document.

Ex. 5 AC/AWP/DP

Please let us know if you have any questions-thanks!
